SUMMARY

Passionate MERN Stack Developer skilled in building responsive, user-focused web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in turning requirements into clean, maintainable code, ensuring scalable and efficient solutions. Eager to learn new technologies and collaborate effectively within teams to deliver quality projects.

TECHNICAL SKILLS

- **Frontend**: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, React, Angular,Redux
- **Backend**: Node.js, Express.js, RESTful APIs, JWT Authentication
- **Languages**: JavaScript, C
- **Databases**: MongoDB
- **Deployment**: GitHub, Netlify, Render, Vercel
- **Other Tools**: Figma, Git,Postman
- **Soft Skills**: Teamwork, Communication, Learning Potential, Responsibility, Time Management, Problem Solving, Adaptability

EXPERIENCE

- **Luminar Technolab(Internship)**   Kakkanad, Kerala
  MERN Stack Developer (Full-time)   *Dec 2024 – Present*
  - Worked on building full-stack web applications using MERN stack.
  - Developed RESTful APIs and integrated backend services with frontend components.
  - Implemented responsive and user-friendly UIs using React.js, HTML, CSS, Tailwind CSS, and Bootstrap to enhance the user experience.
  - Fixed bugs and improved applications performance.
  - Gained practical experience in database schema design and data manipulation using MongoDB.
  - Delivered live applications using platforms such as Vercel, Netlify, and Render, optimizing for performance and deployment efficiency

PROJECTS

- **CampFind – Camping Spot Booking Platform**:
  CampFind is a full-stack web application that allows users to explore, wishlist, review, and book camping spots with real-time capacity validation, ensuring a smooth and intuitive experience. Users can register, log in, search/filter for camping spots, make bookings, leave reviews, manage wishlists, host their own spots, and share their camping experiences through the blog section. The platform includes an admin dashboard for approving camping spots, maintaining quality and trust. Secure payment processing is enabled through Stripe integration.

  Tech used: React.js, Tailwind CSS, Framer motion, Node.js, Express.js, MongoDB, JWT, Context API, Axios

  Live Link: [Live Demo](#)

- **BookStore – Second-Hand Book Marketplace**:
  A full-stack web application where users can upload and sell their second-hand books, browse and purchase books from others, and manage their listings. The platform includes an admin role for approving book listings to ensure quality and payment processing via Stripe for smooth transactions. Additionally, the admin can post career vacancies that users can view and apply for, creating a combined marketplace for books and job opportunities.

  Tech used: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Context API, Axios
